Business Continuity

How can I establish a business continuity plan and a course of action that will accelerate our return to “business as usual” in the wake of a crisis?

90% of companies who are unable to resume operations within 5 days after a disaster are out of business within a year. Use these resources to understand how to test and update your plan to ensure its ever-lasting dependability.

Products & Services

NEW! Accel Members Financial Counseling

How will your credit union assist your members in adjusting to life-changing experiences and get them on the road to financial recovery? Accel Members Financial Counseling offers confidential comprehensive financial counseling services including personal money management assistance, debt repayment plans, and information to avoid bankruptcy, foreclosure, and repossession.

NEW! Agility Recovery Solutions

Within 48 hours of a business interruption, Agility delivers a complete solution to get your credit union back up and running and connected to your members including mobile facility space, computer technology, satellite communications, and portable generators.

Onsite. Anywhere.

Canon USA

Digital imaging has changed the way credit unions manage their flow of information. Canon's innovative and user-friendly document imaging systems can help you protect the critical documents your credit union captures and stores like checks, member-related files and loan applications. Canon can help you create a simple, turnkey approach to records management.

Diebold

Studies have shown that the demand for services, like ATMs, may increase during a disaster. Diebold, leading provider of ATMs to credit unions, has a full range of advanced-function ATMs, cash dispensers, and special application terminals, ready to support your business continuity strategy.

NEW! Perimeter Internetworking

Protecting your credit union's critical business information and having access to your network and email is paramount at a time of emergency. Perimeter Internetworking, a leading provider of managed network security services, has solutions to securely store and easily access records and access a secure connection to your network from anywhere. With Perimeter's email archiving service, your credit union can search for, access, and quickly retrieve any archived email record quickly and easily.

Strohl Systems

PLANet is the industry's only Internet-based business continuity planning tool designed specifically to help your credit union meet NCUA and FFIEC regulations for business continuity and disaster recovery.
